## EXPLANATORY NOTES

1. **Source of Data:** Import documents collected by Customs are the basic source of import statistics, except for data on imports of electricity. These types of imports are reported by the importing firms directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Import statistics for any period include all goods declared on import entries received at DBS during the calendar period, and on electricity reports received within the following calendar month. There is a lapse of up to a week between the actual customs clearance of imports and receipt of the relevant documents in DBS. Electricity imports are usually included in statistics for the period in which these imports actually occurred.

3. **Coverage:** Import statistics include all goods which are cleared by Customs immediately on arrival in Canada, plus goods which are entered into customs warehouses. There may, however, be an important difference in the time at which warehoused goods are recorded as imports: some shipments which enter customs warehouses remain there for several months before clearance.

The following commodity movements are excluded from import statistics: gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy (class 882-99) and a small amount of gold scrap in the form of jewellers' sweepings (class 258-99); current coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign armed forces of diplomats stationed in Canada or brought back by Canadian armed forces or diplomats returning from postings outside Canada; temporary imports for exhibition or competition, and film imported for exhibition or processing or returned after exhibition or processing abroad; ships of British construction and registry imported for use in Canada, and ships purchased for use as international carriers but not used to carry goods between points in Canada; bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad, generally, all temporary imports and goods merely moving in transit through Canadian territory.

4. **Countries Credited:** Imports are credited to the country in which the goods were located when first directed to Canada, except for goods produced in Central or South America but first consigned to Canada from the United States, which are credited to the country of origin.
5. **Quantities:** Table 2 shows quantities in terms of the units specified for each class in the Import Commodity Classification, Vol. 1 (DBS Catalogue No. 12-524). Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment except in certain special cases otherwise defined in the Customs Tariff. Number refer to complete (or substantially complete) units imported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 5.

6. **Values:** The value of goods imported is usually the value as determined for customs duty. The Canadian Customs Act generally requires the valuation of goods f.o.b. point of shipment in the country of export, but importers often report c.i.f. values for free goods or goods subject to specific rates of duty. An effort is made to ensure that f.o.b. values are consistently used in import statistics.
7. **Abbreviations:** Many descriptions of commodities used in this report are abbreviated or incomplete. Full descriptions of all commodities appear in the Import Commodity Classification, Vol. 1. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each quarterly report.
9. **Country Classification:** Statistics are compiled and presented on a geographical basis and the use of state or territorial titles carries no political, territorial or constitutional implications.

# UNITS OF QUANTITY

BBL .....	Volume in barrels.
CARAT .....	Weight in carats.
CORD .....	Volume in cords.
CWT .....	Weight in units of 100 lb.
CWT N .....	Weight of contents in units of 100 lb. (containers excluded).
DOZ .....	Number of dozens.
DZ PR .....	Number of pairs in dozens.
FT .....	Length in linear feet.
GAL .....	Volume in Canadian gallons.
GROSS .....	Number of gross.
KG .....	Weight in kilograms.
LB .....	Weight in pounds.
LB N .....	Weight of contents in pounds (containers excluded).
M .....	Number in thousands.
M B F .....	Volume in thousand board feet.
M C F .....	Volume in thousand cubic feet.
M KWH .....	Thousand kilowatt hours.
NO .....	Number.
OZ .....	Weight in ounces.
PACK .....	Number of packs.
PAIR .....	Number of pairs.
P GAL .....	Volume of alcoholic content in Canadian gallons of the strength of proof.
PKG .....	Number of packages.
SF 3/8 .....	Volume in square feet of 3/8 inch in thickness.
SQ FT .....	Area of square feet.
SQ YD .....	Area in square yards.
TON .....	Weight in short tons of 2,000 lb.
TR OZ .....	Weight in troy ounces.

# IMPORTS BY COUNTRIES

JANUARY - DECEMBER 1971

DOMINION BUREAU OF STATISTICS

## 1. Annual Classification Changes and Year to Year Statistical Comparability

The purpose of these notes is to describe the measures taken in this report to provide for year to year statistical comparability between classes and to outline the reasons for commodity classification changes. In January each year the Import Commodity Classification (M.C.C.) is revised and a number of changes are introduced. These changes take four main forms, the first of which is of the most significance to users:

1. A number of new classes are introduced to permit more precise definition of major commodities moving in trade. This is done by splitting existing classes into one or more new classes; e.g. class 212-49 was split into classes 212-45 and 212-49 in January 1971.
2. Occasionally, where the volume of trade does not warrant separate classification, classes are combined with other classes or become part of a group residual (n.e.s.) class; e.g. 1970 classes 242-39 and 242-75 were combined in January 1971 to form a new class 242-77.
3. Certain classes are re-numbered, largely to bring the MCC in line with the Standard Commodity Classification (SCC) or to provide for future expansion of the classification; e.g. 1970 class 98-05 became class 95-05 in January 1971.
4. In some instances units of quantity are changed as part of the Bureau's continuing program to standardize the units in the various economic statistics series and with the further objective of facilitating eventual conversion to units of metric measurement.

The commodity classification therefore is not static - rather it evolves to reflect the changing composition of Canada's international trade and to better meet the requirements of users. An unavoidable by-product of this process is that when the content or numerical designation of commodity classes change it is not possible to provide in the framework of a report comparable data for the previous year's trade.

In order to eliminate the resultant problem of data discontinuity most class changes will be implemented in this publication only in the year after they are introduced i.e. at the point when comparable data for two years can be provided.

In the interim during the current year the class changes have been treated as follows:

1. Where possible the new classes have been recombined and data for the two years are published on the basis of the 1970 classes.
2. Where 1970 classes have been combined to form a new class in 1971 (e.g. class 242-77) the combination has been performed retroactively on the 1970 data i.e. the data for the two years are published under the 1971 class.
3. Where, because of changes in class definition and content, it has not been possible to recombine 1971 data on the basis of specific 1970 classes the classes involved have been aggregated for both years and combined with the appropriate residual class to provide a direct year to year comparison e.g. classes 584-99

and 784-79. In two cases no appropriate residual class was available and so comparable aggregates are shown under "dummy" classes 338-40 and 338-59.

4. New units of quantity have been introduced for a number of groups and classes. With one exception (class 479-22) it has been possible to convert 1970 data to the new 1971 units. No quantity data will be published for class 479-22 until 1972.

The above measures have been taken to ensure the possibility of year to year comparisons. This has been done only at the cost of supressing, for one year, specific statistics for the new 1971 classes (except where these represent an amalgamation of 1970 classes). Users wishing to obtain information on 1971 trade in the new classes may do so by reference to catalogue no. 65-007 which reports trade monthly by commodity class by country. The classes affected by the 1971 Import Commodity Classification changes are listed below under Annexes I and II. Annex I shows the regular classification changes in the order of the 1971 version of the Import Commodity Classification. Annex II lists classes which were re-arranged in the manner described above in order to make year to year comparisons possible. The order adopted for this list follows that of "equivalence" codes used in this report.

All classes where no code changes have taken place, but for which, in order to insure comparability, quantities have been converted to a common unit, are detailed at the end of the list.

Note: Data which form the basis for this publication are rounded and shown in thousands of dollars. Values smaller than \$500 are rounded to nil and denoted by a blank. Users who encounter a class identification in front of which there are no value data for either or both periods should be aware that the transactions involved were insignificant.

CHANGES IN IMPORT COMMODITY CLASSIFICATION, EFFECTIVE JANUARY 1, 1971

Annex II

Equivalence Classes, Import Commodity Classification 1971

The numbers appearing at the left hand side of the codes listed below have the following meaning:

- (1) Classes with new 1971 numbers but with unchanged content from 1970.
- (2) Where 1970 classes were split up into new 1971 classes these were recombined to show data on the basis of the 1970 classes.
- (3) Where 1970 classes were combined to form a new class in 1971 the data are shown under the new 1971 class.
- (4) Where, because of changes in class definition and content it has not been possible to recombine 1971 data on the basis of specific 1970 classes, the classes involved have been aggregated for both years and combined with the appropriate residual class to provide a direct year to year comparison. In four cases no appropriate residual classes were available and so comparable aggregates are shown under "dummy" (\*) classes.
- (5) Denotes classes where new units of quantity were introduced in 1971.

## EXPLANATORY NOTES

1. **Source of Data:** Import documents collected by Customs are the basic source of import statistics, except for data on imports of electricity. These types of imports are reported by the importing firms directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Import statistics for any period include all goods declared on import entries received at DBS during the calendar period, and on electricity reports received within the following calendar month. There is a lapse of up to a week between the actual customs clearance of imports and receipt of the relevant documents in DBS. Electricity imports are usually included in statistics for the period in which these imports actually occurred.
3. **Coverage:** Import statistics include all goods which are cleared by Customs immediately on arrival in Canada, plus goods which are entered into customs warehouses. There may, however, be an important difference in the time at which warehoused goods are recorded as imports: some shipments which enter customs warehouses remain there for several months before clearance.

The following commodity movements are excluded from import statistics: gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy (class 882-99) and a small amount of gold scrap in the form of jewellers' sweepings (class 258-99); current coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign armed forces or diplomats stationed in Canada or brought back by Canadian armed forces or diplomats returning from postings outside Canada; temporary imports for exhibition or competition, and film imported for exhibition or processing or returned after exhibition or processing abroad; ships of British construction and registry imported for use in Canada, and ships purchased for use as international carriers but not used to carry goods between points in Canada, bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad, generally, all temporary imports and goods merely moving in transit through Canadian territory.

4. **Countries Credited:** Imports are credited to the country in which the goods were located when first directed to Canada, except for goods produced in Central or South America but first consigned to Canada from the United States, which are credited to the country of origin.
5. **Quantities:** Table 2 shows quantities in terms of the units specified for each class in the Import Commodity Classification, Vol. 1 (DBS Catalogue No. 12-524). Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment except in certain special cases otherwise defined in the Customs Tariff. Number refer to complete (or substantially complete) units imported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 5.

6. **Values:** The value of goods imported is usually the value as determined for customs duty. The Canadian Customs Act generally requires the valuation of goods f.o.b. point of shipment in the country of export, but importers often report c.i.f. values for free goods or goods subject to specific rates of duty. An effort is made to ensure that f.o.b. values are consistently used in import statistics.
7. **Abbreviations:** Many descriptions of commodities used in this report are abbreviated or incomplete. Full descriptions of all commodities appear in the Import Commodity Classification, Vol. 1. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each quarterly report.
9. **Country Classification:** Statistics are compiled and presented on a geographical basis and the use of state or territorial titles carries no political, territorial or constitutional implications.

## UNITS OF QUANTITY

BBL .....	Volume in barrels.
CARAT .....	Weight in carats.
CORD .....	Volume in cords.
CWT .....	Weight in units of 100 lb.
CWT N .....	Weight of contents in units of 100 lb. (containers excluded).
DOZ .....	Number of dozens.
DZ PR .....	Number of pairs in dozens.
FT .....	Length in linear feet.
GAL .....	Volume in Canadian gallons.
GROSS .....	Number of gross.
KG .....	Weight in kilograms.
LB .....	Weight in pounds.
LB N .....	Weight of contents in pounds (containers excluded).
M .....	Number in thousands.
M B F .....	Volume in thousand board feet.
M C F .....	Volume in thousand cubic feet.
M KWH .....	Thousand kilowatt hours.
NO .....	Number.
OZ .....	Weight in ounces.
PACK .....	Number of packs.
PAIR .....	Number of pairs.
P GAL .....	Volume of alcoholic content in Canadian gallons of the strength of proof.
PKG .....	Number of packages.
SF 3/8 .....	Volume in square feet of 3/8 inch in thickness.
SQ FT .....	Area of square feet.
SQ YD .....	Area in square yards.
TON .....	Weight in short tons of 2,000 lb.
TR OZ .....	Weight in troy ounces.
